

The Regional Market Report Dashboards provide an interactive online management information system which enables independent analysis to be performed on the offshore oil and gas industry within a specific region. There are seven regional dashboards: Africa, Asia, Australasia, Europe, Latin America, Middle East & Caspian and North America. Each dashboard displays information covering a ten year timeframe, five years historic and a five year forecast. Supporting commentary is also provided to highlight key projects and trends within each region.

REGIONAL REPORT TITLES

Each regional report includes capital expenditure and installations forecasts for each market sector, including: fixed platforms, floating production systems, subsea, SPMs, pipelines and control lines. For each market sector Capex and installation forecasts can be further analysed by: operator, country, water depth as well as by other key sector specific components, for example, for fixed platforms a weight group segment would be available, whilst for pipelines diameter would be an option.

The interactive online dashboard enables clients to perform independent analysis on each offshore sector within the selected region. Navigational controls enable the user to immediately recompile the information shown according to their preference. This new service offers our clients the ability to subscribe to access a single quarter's forecast for a period of 12 months, or to subscribe to this service for a year to obtain quarterly chart updates.

- Asia
- Australasia
- Europe
- Latin America
- Middle East & Caspian
- North America

REPORT DASHBOARD

InfieldAnalytics is Infield Systems' new online business intelligence dashboard application. This management information system increases the analytical value that our clients obtain from our reports and forecasts by delivering them via an interactive system that dynamically updates its views based on their choices; allowing them to immediately perform their own analysis.

The InfieldAnalytics navigational controls enable clients to immediately recompile the information shown by: geography (global or regional), by sector (operator, water depth, platform type, etc.), and to choose the metric (Capex or installation numbers). Additional chart filter options are available with the advanced subscription - for more details please contact us.

InfieldAnalytics is capable of delivering each new forecast edition as soon as it is compiled, so clients have access to the latest information based upon the current market conditions.

REPORT DASHBOARD PRICE LIST

Prices shown below are for the standard report dashboard. To discuss having the ability to filter the information displayed by a variety of additional options please contact us.

www.infield.com/report/regionals

Report Formats & Online Access Upgrades	Single Licence (£)	Additional Licence (£)	Five User Licence (£)
Regional Market Report Dashboard to 2019 (initial licence provides 12 months access to the information for a single quarter's forecast, for a single region)	3,250	900	5,900
Quarterly chart update (price per quarter, per regional report dashboard, purchased within 12 months of the initial licence)	2,000	600	3,750
Annual subscription to a single regional report dashboard (One fully updated report and 3 subsequent quarters of chart updates)	7,000	2,050	13,000

INFIELDANALYTICS - DASHBOARD LAYOUT

Source: InfieldAnalytics

1. **Market Selection** - this provides clients with the option to change the contents of the chart so that they can compare sector specific information, including: control lines, fixed platforms, floating production systems, pipelines, SPMs and subsea.
2. **Segment Selection** - this option enables the user to segment the information displayed by country, by operator, by water depth and then by other market specific segmentations - for example, select platforms and a weight group segment would become available, or for pipelines diameter would be an option.
3. **Metric Selection** - this enables clients to alter how information is compiled so that figures displayed correspond to either EPIC Capex (phased work year) or number of installations.
4. **Forecast Edition Selection** - recompiles all information displayed according to a specific quarter's forecast - access is determined by a client's subscription level.
5. **Analytical Commentary** - the text featured in this section is determined by the criteria selected when using the navigational controls at the top of the report. The home page features text which provides a high level market summary.
6. **Regional Equipment Map** - provides an interactive geographical summary of installations.
7. **Market Share by Sector Selection** - the inner circle represents 2010-2014 while the outer circle denotes our forecast (2015-2019).
8. **EPIC Capex/Installations by Sector Selection** - provides an interactive ten year forecast (2010-2019) for either Capex or installation counts, overlaid by a 3 and 5 year rolling CAGR.
9. **Data Table for the Metric Selection (EPIC Capex in USD\$m/installations) by Sector Selection** - provides the summary data according to the selection criteria used.
10. **Market Performance versus Oil Price** - this chart plots oil price against forecast Capex for the chosen market.
11. **Individual Chart Menu** - each chart has its own independent menu where users have the option to explore or export the chart and its data.
12. **Advanced Analytical Chart Filters** - it is possible to purchase an advanced subscription whereby subscribers can filter the information displayed by a variety of additional options (time base, country, equipment type, operator, water depth group, sector, etc.) to create their own bespoke charts. To obtain a quote for this option, please contact us.
