

Infield System's ninth edition of the widely acclaimed Global Perspectives Deep and Ultra-deepwater Market Report To 2017 provides detailed and comprehensive analysis into what has become the leading offshore growth market today. The forecast provides in-depth analysis on both global and regional capital expenditure on developments at water depths of 500 metres and greater across the key market sectors of: platforms, subsea, pipelines and control lines. Indeed, all seven regions examined within the report are expected to undergo deepwater capital expenditure growth over the forthcoming five year period to 2017.

As demand for energy continues to increase, the search for vital energy resources is expanding further offshore into harsher and deeper waters. Whilst deepwater reserve additions are expected to remain a marginal proportion of overall global production; rising from a 7% cumulative share of global reserves in 2012 to an expected 10% share by 2017, in Capex terms, the deepwater market, which requires considerably higher capital expenditure than its shallow water counterparts, is expected to rise from a 38% share in 2012 to a 53% share of global offshore Capex by the year 2017. This growth, whilst centring upon the 'Deepwater Triangle' of Brazil, West Africa and the North American Gulf of Mexico, is also expected to be supported by less traditional areas of deepwater development, including offshore South East Asia, Australasia and Europe; whilst this latest market update to 2017 also sees substantial growth in deepwater development offshore Middle East and Caspian.

**Global Deepwater Capital Expenditure (US\$m) by Region 2013-2017**

Source: Deep and Ultra-Deepwater Market Report to 2017

Development offshore Brazil is expected to lead the global deepwater market going forwards to 2017; with expenditure expected to centre around the Lula and Franco developments. However, with Brazil's economy growing at an unprecedented pace, the following period is also expected to be pivotal in the development of Brazil's offshore reserves and a testing time for its NOC Petrobras.

Within the North American region, the Gulf of Mexico deepwater market is expected to continue to gain in strength post-Macondo, with activities expected to be led by IOC Shell, holding a 24% market share of capital expenditure on deepwater developments; with the ultra-deepwater Stones and Appomattox projects expected to be central to this investment.

Offshore Africa, Angolan developments are expected to be at the forefront of deepwater investment, with the country forecast to hold a 52% share of the regional Capex spend. Here, key prospects anticipated to command significant expenditure include: the

Kaombo I and II fields, Lucapa and BP's PAJ. However, whilst West Africa is expected to remain the primary driving force of deepwater development within the region going forwards, towards the end of the period, deepwater activity offshore East Africa is expected to increase, with development of the Prosperidade complex offshore Mozambique expected to draw particular industry attention and substantial expenditure.

Offshore Asia key fields anticipated to enter production during the forecast include: Liwan offshore China; Shell's Gumsut-Kakap development offshore Malaysia; and the Gendalo-Gehem project, developed by Chevron offshore Indonesia and expected to enter production in 2016. Over the following five year period Infield Systems also expects a growing diversity in deepwater production within the region, with new areas of development including: Brunei, Myanmar and Sri Lanka emerging towards the end of the current forecast period.

European deepwater demand is expected to increase substantially, with the giant Aasta Hansteen expected to be the third most capital intensive deepwater field development globally over the timeframe. In operator terms, Statoil is expected to form the largest market share going forwards, with other key players expected to include: Chevron; directing significant spend towards the Rosebank development, and Gazprom, leading the South Stream project, also expected to invest heavily within the European deepwater market going forwards to 2017.

Prospects offshore North Western Australia have attracted considerable attention over recent years, with capital expenditure commencing on the Chevron and ExxonMobil operated Greater Gorgon area during 2011. Going forwards, the deepwater market offshore North Western Australia is expected to increase its global market share from 1% to 3%, with ExxonMobil expected to lead development spend as a result of significant expenditure on the Jansz field and the long-awaited Scarborough development.

Offshore Middle East, whilst remaining the smallest market for deepwater development spend, Infield Systems expects Independent operator Noble Energy to drive investment, with the giant gas developments offshore Israel expected to demand the largest proportion of the region's deepwater spend over the period. Within the Caspian area, BP is also expected to continue the development of Shah Deniz offshore Azerbaijan.

## About This Report

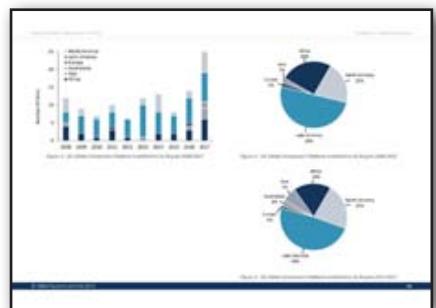

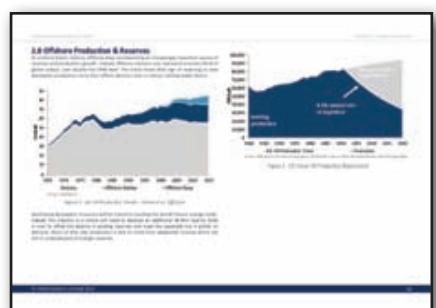

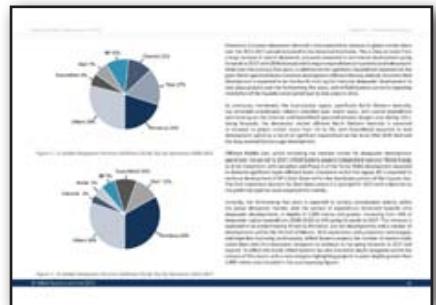

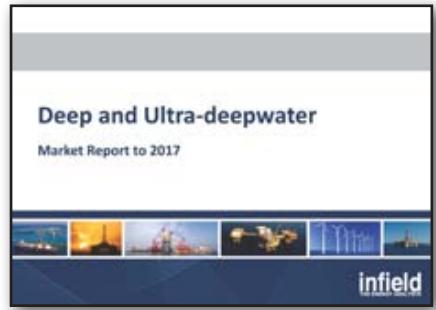

|                    |     |
|--------------------|-----|
| Number of Pages:   | 336 |
| Number of Figures: | 394 |
| Number of Tables:  | 215 |

## Report Contents

- **Executive Summary** provides an overview of the global and regional trends presented throughout the report, with a summary of global capital expenditure by region and market segment.
- **Global Market Overview** provides an overview of: current economic conditions in both developed and emerging markets, oil price trends and field sanction points, offshore production and reserves, as well as key industry trends, including the impact of unconventional and the growth of LNG on the global market
- **Global Deepwater Business Overview** presents the major development projects and regional focus of the top six operators: Petrobras, Shell, Total, BP, Chevron and ExxonMobil over the next five years, as well as their longer term exploration and business strategies. Key contractors within the subsea tree market over the forecast period are also presented. Within this section, a breakdown is provided, region by region, of forecast capital expenditure on: subsea, platforms, pipelines and

control lines. In addition, a regional breakdown of platform installations, number of subsea wells, and installation of pipelines and control lines by length (km) is also presented.

- **Regional Analysis and Forecast** contains a detailed analysis and forecast for the seven regions: Africa, Asia, Australasia, Europe, Latin America, Middle East and Caspian, and North America. This section provides an overview of the key trends and prevailing geopolitical conditions affecting regional oil and gas markets, in addition to the key operators present, and the future prospects for each region. Within this section, data is provided on capital expenditure by country, as well as the specific market segments of platforms, subsea infrastructure, pipelines and control lines over the ten year period of analysis (2008-2017).

## Why You Should Buy This Report

- The report contains data developed by Infield Systems' market modelling process, OFFPEX, which is based on a unique "bottom up approach" to forecasting. OFFPEX's component by component and project by project forecasting process is robust and has a proven track record.
- Deep and Ultra-deepwater is one of the core publications within the Global Perspectives series, and offers an in-depth analysis of the key market segments, countries and operators within this key offshore growth market. With the prospects for the deepwater market increasing, this report also highlights new areas of exploration as well as how advances in technology will enable operators to realise the potential of developments previously considered to be marginal.
- The report provides an independent and comprehensive analysis of the drivers and challenges which are impacting development strategies, exploration activity and project timelines. This is supported by the inclusion of a detailed analysis of operator capital expenditure within the deepwater market over the 2008-2017 timeframe.

## Global & Regional Perspectives Market Reports

Infield Systems publishes a range of market reports covering various aspects and regions of the oil, gas, renewable energy and associated marine industries. Utilising comprehensive in-house project databases, industry models and research capacity these reports are widely used by industry analysts and professionals:

- Deep & Ultra-deepwater
- Subsea
- Pipelines & Control Lines
- Fixed Platforms
- Floating Production Systems
- Offshore LNG
- Specialist Vessels & Accommodation
- Subsea Well Intervention
- Remotely Operated Vehicles
- Africa
- Arctic
- Asia
- Australasia
- Europe
- Latin America
- Middle East & Caspian
- North America

## EXECUTIVE SUMMARY

### MACRO MARKET OVERVIEW

- Introduction
- Global Economic Update
  - Developed Economies
    - Eurozone
    - United States
    - Japan
  - Emerging Markets
    - China
    - India
    - Brazil
- Oil Markets
  - Short Term Price Dynamics
  - Long Term Price Dynamics
  - Base Case Scenario
  - Oil Glut Scenario
  - Commodity Super-Cycle Scenario
- Gas Markets
  - A New Demand Trajectory
  - The Retreat of Nuclear Power
  - The Rise of Shale Gas
  - The Internationalisation of Gas Markets
- Field Sanction Points
- Production Cost Curve

- Oil Companies & Contractors
  - Oil Companies
  - Oilfield Services
  - Drilling
  - Fabrication Yards
- Offshore Production & Reserves
  - Undeveloped Oil & Gas Reserves
  - Undeveloped Oil Reserves
  - Undeveloped Gas Reserves
- Key Trends
  - Deepwater
  - Harsh Environment
  - Marginal Developments
  - SURF vs. Conventional Field Developments
  - Growth in LNG
  - Impact of Unconventionals
    - Shale Gas
    - Tight Oil

### GLOBAL OVERVIEW

- Global Operator Capex
- Global Capex by Water Depth
- Supply Overview
- Global Deepwater Platforms
- Global Deepwater Subsea
- Global Deepwater Pipelines
- Global Deepwater Control Lines

### REGIONAL OUTLOOK

- Introduction
- Africa
  - Market Overview
  - Operators, Manufacturers and Yards
  - Key Developments
  - Deepwater Development by Country
  - Deepwater Platforms
  - Deepwater Subsea
  - Deepwater Pipelines
  - Deepwater Control Lines
- Asia (same as Africa)
- Australasia (same as Africa)
- Europe (same as Africa)
- Latin America (same as Africa)
- Middle East & Caspian (same as Africa)
- North America (same as Africa)

### APPENDICES & NOTES

- Defined Regions/Countries
- Glossary, Acronyms & Abbreviations
  - Glossary
  - Product/Service Definitions
  - Abbreviations & Standards of Measurement
  - Organisations and Names

## Online Database

### Deepwater Online (Essentials)

Purchasers of the Global Perspectives Deep & Ultra-deepwater Market Report to 2017 receive 12 months access to a database of fields in water depths of 500 metres and greater, being planned, or considered for development, in the current year and four years forward, worldwide. Deepwater Online (Essentials) is continually updated with the following information provided about each project:

- Field Operator
- Project Name
- Development Type
- Date / Year On Stream
- Date / Year Discovered
- Numbers of Subsea / Surface Wells
- High Temperature / High Pressure
- Reserves
- Field Production Rates
- Location
- Development Type
- Water Depths
- Project Status
- Depletion Date /Year

### Deepwater & Subsea Online Upgrades

The Deepwater Online (Essentials) access can be upgraded to Deepwater Online (Standard) or Deepwater Online (Professional), or to include either of the two Subsea Online packages: Standard or Professional. Prices for upgrades are detailed overleaf.

Data sets can also be customised by including other field types or data sets from the Infield Offshore Energy Database, including: floating production systems, fixed platforms, subsea completions, pipelines, control lines, offshore loading, supply chain contracts, vessels, drilling rigs and onshore terminals or LNG and GTL plants and facilities. For customised data sets please contact [data@infield.com](mailto:data@infield.com) to discuss your specific requirements and to obtain a quotation.

**Deepwater Online (Standard)** identifies all fields in water depths of 300 metres and greater, which are currently producing, or being planned or considered for development, from the current year onwards, worldwide.

**Deepwater Online (Professional)** includes all fields within the Deepwater Online (Standard) data set, but also identifies the ownership (companies and percentage holdings) for each deepwater field. The ownership information is presented as a text column within the fields information for easy review and as a separate data set, with each percentage holding listed separately for detailed analysis.

**Subsea Online (Standard)** identifies all fields which are going to be developed with one or more subsea wells in the current year and four years forward, worldwide.

**Subsea Online (Professional)** identifies all fields, operational and future, which have been, or are going to be, developed with one or more subsea completions.

# About Infield Systems

Infield Systems is an independent energy research and analysis firm that is dedicated to the provision of accurate and up-to-date data, market reports, mapping, analysis and forecasts for the offshore oil and gas and associated marine industries. Infield Systems also prepares market due diligence on mergers, acquisitions and transactions for clients in the energy industry. Infield Systems services clients in over 40 countries, including E&P companies, contractors, manufacturers, government agencies and financial institutions, and is widely acknowledged as the definitive independent source for information, research and analysis on the offshore energy sector.

Infield Systems has developed a variety of business tools to help

## Fax Order Form: +44 20 7423 5050

To order the Global Perspectives Deep and Ultra-deepwater Market Report To 2017, please complete the fax order form below or buy online at [www.infield.com](http://www.infield.com)

For reports supplied electronically with a single user licence, the file is locked to a single user on a single computer with a single print to hard copy. Additional printed and bound and single user electronic copies may be purchased for use within a single organisation.

Infield Systems uses the LockLizard system to control the distribution and copyright of reports supplied as single user licence and you must be able to install LockLizard viewer and the LockLizard licence key which requires administrator rights. If you are not able, or permitted, to install the viewer or licence key then please contact Infield Systems.

The Deepwater Online (Essentials) online access may be upgraded to either the Standard or Professional versions. Prices for upgrades, additional and corporate licences are set out below.

companies make business decisions, all of which are supported by direct access to consultants, senior analysts and support staff:

- Offshore Energy Databases
- Marine Databases
- OFFPEX Market Modelling & Forecasting
- Mapping & GIS
- Energy Sector Market Reports
- Bespoke Forecast Reports
- Supply & Demand Models
- Market Due Diligence

## Order Online @ [www.infield.com](http://www.infield.com)

All prices shown below are exclusive of VAT which will be charged at the prevailing rate, where applicable.

Infield Systems accepts payment by bank transfer, credit card (Visa, MasterCard or American Express) or by cheque. Delivery is upon receipt of payment. For credit card purchases please supply the card's billing address along with the billing Post Code/Zip Code and the four digit security code on the front of American Express cards, or the three digit code on the reverse of MasterCard and Visa cards. All European Union companies must supply their EU VAT number.
