

Infield Systems is a consulting and advisory company to the offshore oil, gas and marine industries as well as being a market leader in the provision of research, project data, market forecasts and GIS mapping. Working with leading global organisations across both the energy and the financial services sectors, Infield Systems is widely acknowledged as the definitive independent source for information, research and analysis on the offshore energy sector.

CONSULTING SERVICES

Infield Systems is a leading provider of bespoke consultancy and research services relating to the offshore oil, gas, renewable energy and associated marine industries. Studies have been undertaken for a wide range of clients, from major exploration and production companies, through to contractors, equipment manufacturers, national governments and agencies and the global financial community. The core strength of the Consulting Services team is its ability to draw on Infield Systems' independently researched databases, market models, market intelligence tools and information resources, in conjunction with utilising an excellent global network of contacts, in order to provide answers to some of the most difficult questions facing industry executives and professionals.

In recognition of the differing needs of our clients, Consulting Services is divided into two separate teams; Business Strategy and Analysis and Transaction Services. Each team is able to support and respond to client requests with a focussed approach and can develop the business tools specific to their core markets.

BUSINESS STRATEGY & ANALYSIS

The Business Strategy and Analysis team has delivered hundreds of studies covering a broad range of topics.

Key areas of expertise include:

- Market sector tracking
- Complete market intelligence outsourcing
- Market entry strategy
- Major investment decision support
- Procurement strategy advisory
- Business plan support
- Customer targeting & referencing

TRANSACTION SERVICES

Transaction Services provides an advisory service to the global financial community, advising both public and private institutional investors.

Key areas of expertise include:

- Market/Pre IPO due diligence /M&A
- Distressed asset purchases
- Debt & asset finance
- Opportunity identification
- Offshore oil & gas production infrastructure
- Marine & rig assets
- Engineering & fabrication capabilities

MARKET INTELLIGENCE TOOLS

Infield Systems has developed a range of market intelligence tools which are designed to support clients through their business strategy and planning decisions. Some of our most popular offerings include:

- **InfieldRigs** - provides key information and analysis about the offshore oil and gas rig market, including: day rates, global and regional rig utilisation, current, future and historic contracts for each asset and detailed information about each drilling rig unit. Bespoke reports can be supplied.
- **InfieldTracker** - provides sector specific, tailored market information and forecasts which are delivered on a regular basis to coincide with a company's business planning process. This service enables a company to track its performance against the rest of the market, thereby identifying new market opportunities.
- **InfieldROV** - this service examines the global unit supply for both the work class and trenching units, the demand for such assets and examines the regional manufacturers and operators of such solutions. Infield Systems can also offer similar services around the host vessels and rigs that operate ROV and trencher assets.

MARKET FORECAST REPORTS

Infield Systems publishes a range of market reports covering various global sectors and regions of the oil, gas, renewable energy and associated marine industries. Utilising comprehensive in-house project databases, industry models and research capacity these reports are widely used by industry analysts and professionals.

The market reports provide detailed information, analysis and insight into market trends over the next five years, including detailed Capex and installations forecasts.

PROJECT DATABASES

The InfieldLive Client Portal is the interface to all of our data sets and it enables our clients to perform their own online searches, advanced searches and export results. Data can be accessed in two ways: through the various data tabs for Fields, Platforms, InfieldProjectFlow etc. or via the Downloads tab, where you can download individual or all available data sets in their entirety.

If you would like to see a sample from any of our data sets then we can arrange for either a random sample of six projects or six projects of your own choosing.

DATA SETS

- Fields
- Platforms
- Subsea Completions
- Pipelines
- Control Lines
