

Infield Systems Launches New Project Contracts Database At The Offshore Technology Conference

Goliat (Barents Sea 7122/07-01) (PL 229)		CB&I																	
Project Details		Location																	
Field Name:	Goliat (Barents Sea 7122/07-01) (PL 229)	Country:	Norway																
Operator:	Eni	Region:	NWECs																
Date On Stream:	01/10/2013																		
Status:	Under Development																		
Type:	Oil																		
Key Dates		System Information																	
FID Date:	Unknown	Last Updated:	03/02/2011																
PDO Approval Date:	18/06/2009	Contract ID:	4094																
Comments																			
07/03/2011 - 3-2-11: Aker Solutions have the installation of the subsea power cable. 1-2-11: AGR Field Operations has been awarded a contract by HHIs for the provision of Maintenance Engineering and Inspection Planning services 21-12-10: Aker Solutions has been awarded the tie-in and connector scope associated with the Goliat flowlines and risers contract by Technip Norway 24-11-10: Aker Solutions has secured an important contract to supply heating systems for the subsea pipelines that Technip will deliver and install. BW Offshore have offloading system

The Offshore Technology Conference will see the launch of Infield Systems new database service that tracks supply chain contracts within the offshore oil, gas and associated marine industries. The new Project Contracts Database links Infield Systems' existing comprehensive databases on oil and gas field developments, assets, yards, drilling rigs and offshore construction vessels to the supply chain contracts and contractors.

The Project Contracts Database tracks an offshore oil and gas project from its initial discovery right through appraisal, planning development, development and through to first oil.

This comprehensive database service provides vital information on contractors that are bidding for the different stages of the engineering for a project, as well as which yards are competing to build the different structures and facilities that are required to develop the field, which is linked to Infield Systems' comprehensive yards database. The installation contractors are also tracked and linked to Infield Systems Vessel Contracts Database.

The Project Contracts Database records the key data on projects such as FID (Final Investment Decision) and PDO (Production Development & Operation) approval. The date on which all major contracts have been awarded for each project is also recorded. To assist in the interpretation of this data, the Project Contracts Database includes sequenced comments on projects to provide qualitative for users.

The contacts (and key dates) covered in Project Contracts Database are:

- Conceptual design
- Pre-FEED
- FEED (Topsides, Hull/Jacket, Subsea)
- FID (Final Investment Decision)
- Subsea Production Systems (Trees, Boosting, Risers, Umbilicals, Flowlines, Flexibles)
- PDO Approval.
- EPC Contractor (Topsides Engineering, Hull/Jacket Engineering, Topsides Yard, Hull/Jacket Yard)
- Integration yards
- Pipelay Contractor
- Installation Contractor (Installation Vessel)

The Project Contracts Database is available for view on booth 9329

About Infield Systems Ltd

Infield is an independent energy research and analysis organisation that is dedicated to the provision of accurate and up-to-date data, market sector reports, mapping, analysis and forecasts to the offshore oil and gas and associated marine industries. Infield services clients in over 40 countries from a wide range of organisations including E&P companies, contractors, manufacturers, government agencies and the financial community. Infield is widely acknowledged as the definitive independent information resource and has been involved in many US\$bn of merger, acquisition and transaction market due diligence.
